

I listen to only a couple of radio stations. One of them is K-LOVE. I get much joy from not only the encouraging, uplifting music, but also from the on-air personalities. In the US we are bombarded by negativitiy in the media. Music lyrics and what DJs now say on air is much of the time negative and destructive to our society. I believe that it is in the public interest to have K-LOVE available, not only where I live, but in many cities across the country. K-LOVE does so much more than play music. They have a prayer ministry that is awesome. They truly do positively change lives through Jesus Christ. I would certainly feel a void in my life if K-LOVE were not available. I urge the FCC to not make changes relative to FM translator services that would negatively impact K-LOVE's ability to broadcast. Thank you. Max Niemann
